EXPERIENCE

Fullstack Software Engineer

08/2025 – Present | Costa Mesa, CA

Freelance 

- Collaborated with designer to develop a responsive website by translating design specifications into a fully deployed application suited for desktop and mobile devices
- Built and deployed a blog with server side rendering for improved SEO rankings

Fullstack Software Engineer

09/2021 – 01/2025 | Los Angeles, CA

Byte 

- Took ownership of building out the frontend and backend of a user intake form to convert leads from users seeking supplemental care after the shutdown of a major competitor
- Created reusable functional components in the company's customer-facing web application used by thousands of customers tracking their teeth-alignment journey
- Investigated bugs across multiple microservices and built long and short term solutions to resolve issues
- Collaborated with devops to release new features to live users and monitored logs to ensure application stability in case of production errors requiring immediate solutions and remedy
- Developed custom serverless RESTful API endpoints in the cloud to ensure reliable data transfer throughout organization's microservices

Fullstack Web Developer

08/2019 – 08/2021 | Los Angeles, CA

Sunrise Integration 

- Built an e-commerce analytics dashboard displaying sales data to improve visibility of store performance
- Transformed figma designs to create company's landing page using a JavaScript based CMS for optimized SEO and managed subsequent deployments using AWS cloud tools
- Developed secure RESTful API endpoints with custom middleware to ensure reliable and protected data flow across the application
- Implemented custom webhooks and configured AWS CloudWatch logs for monitoring and debugging
